PHP For Toasters and Everything Else

Robert Cohn
Robert.S.Cohn@intel.com
Intel

About Me

- Architect for Intel XDK: xdk.intel.com
 - Tools to make apps for iOS, Android, & Windows 8 with HTML & JS. Publish in google play, App Store.
 Free.
- XDK added support for making IoT Apps
- Taught IoT course at Harvard & Intel

Where is the Toast?

- Talk will focus on the 'everything else'
- There will be toast at the end

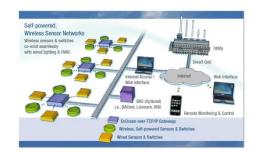

What is the Internet of Things?

- Internet and Web focused on person-to-person communication, sharing documents
 - Email, chat, images, audio, video, ads, commerce
- Internet of Things (IoT) connects the physical world
 - Observation: sensors
 - Is the door closed?
 - What is the temperature?
 - Analysis
 - Big data: Do we need to provision more power generation?
 - Small data: Am I riding a bike or driving in a car?
 - Actuators
 - Unlock the door
 - Turn on the lights
 - Adjust the temperature

IoT will impact every aspect of our everyday life: comfort, health, safety, environment

IoT Applications

Business

Lighting, HVAC, Energy

Security

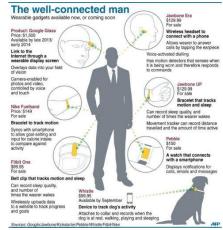

Healthcare

Consumer

Smart Home

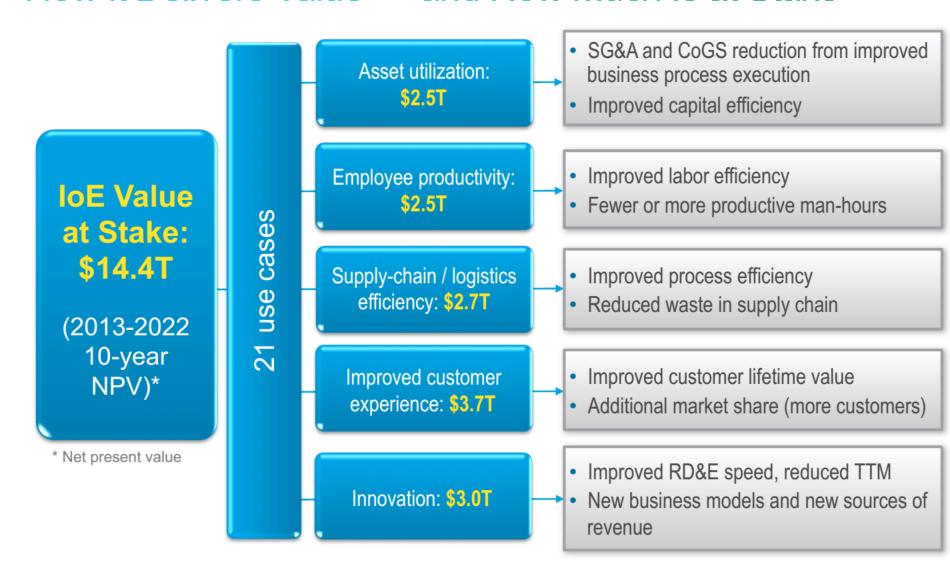

Automotive

Wearables

IoT Financial Impact

- Today
 - 7B people
 - 3B internet users
- 2020
 - Gartner:
 - Smartphone/tablet/pc: 7.3B
 - Connected devices: 26B, \$300B incremental revenue, \$1.9T in value-add sales
 - Cisco: 50B devices, \$14.4T NPV
 - Intel, UN, IDC: 200B devices

Internet of Everything: How It Delivers Value — and How Much Is at Stake

Nest Story

- Google acquired Nest for \$3.2B
- Google monetizes information it collects about you
 - Only knows what you do on the internet
 - Only can reach you while you are connected
- Thermostats and smoke detectors are just the first devices

IoT and PHP

- IoT is built on web technologies
 - HTTP, REST, HTML, web sockets, ...

User Interface

Irrigation

Fitness Device

Web Services

Logging

Analytics

Social networking

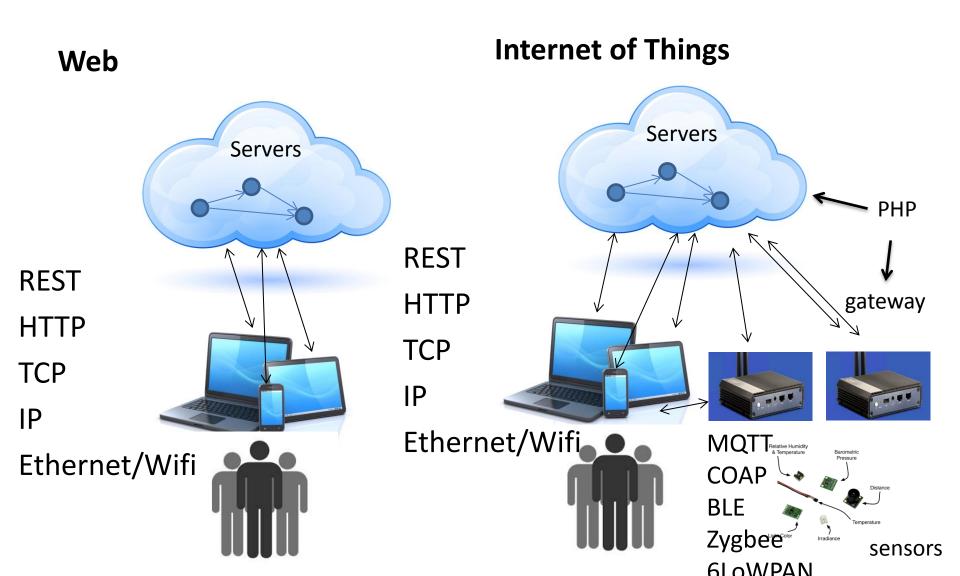

Burglar Alarm

Security Camera

At a high level, everything looks the same

What is Different?

Challenges

- UX/UI
- Scale
- Power
- Cost
- Reliability
- Privacy
- Security

IoT Applications

Device + Companion App

Companion App: Access data and control

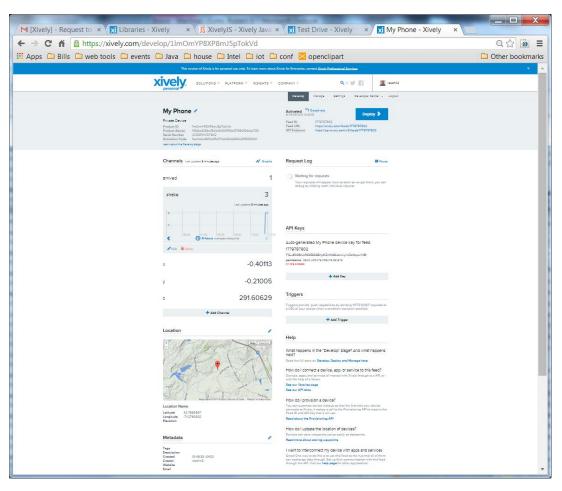

Device + Companion App + Services

Services

- IoT: collect data, analysis, action
- Services needed to manage data
- Web app to view
- Intel, Microsoft, Oracle, IBM, ...
- Integrations: Anypoint Studio/Mulesoft, Temboo

Xively (LogMeIn)

- Try out the test drive
- Workflows
 - Provisioning:registering a device,secure connection
 - Data feeds and visualization
 - Triggers

Getting Started

- Make something!
- It's fun
- Solve a problem that connects to your everyday life
 - Home, recreation, social
- Work with a partner: co-worker, friend, son/daughter
- Touch something real

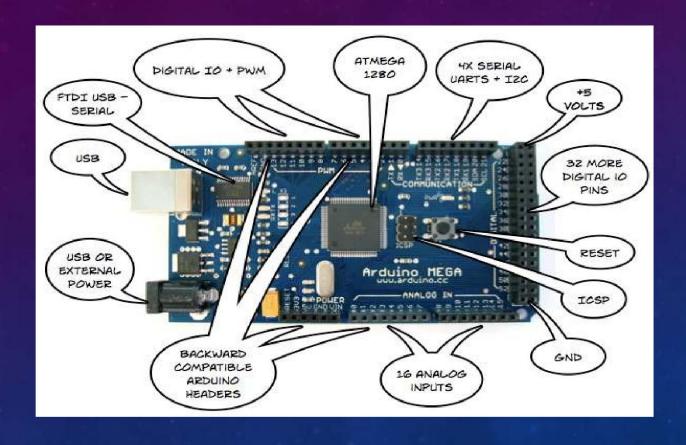

Prototyping Tools

- Hardware
- Software

Hardware

- Cheap and accessible, thanks to maker community
- Community knowledge
- Microcontroller and single board computer kits
- Electronic components
- Circuit board manufacturing
- 3D printing
- CNC

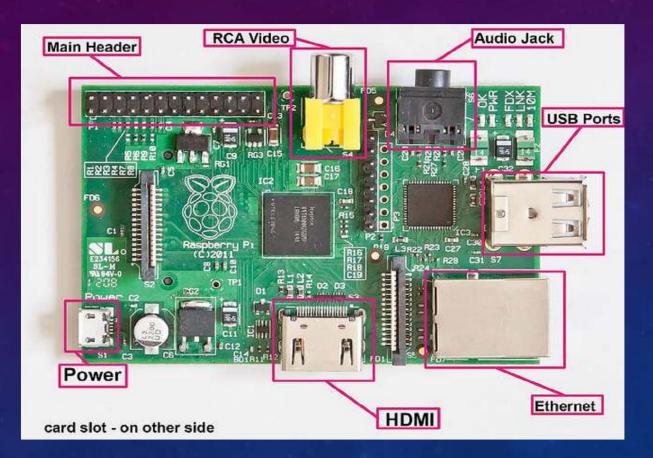

ARDUINO MEGA

\$10-\$45 Connector/interfaces to plug in wide variety of components Program in Wiring (C-like) with Arduino IDE Battery powered

No OS Limited programming tools Processing power of 1985 PC

INTEL GALILEO

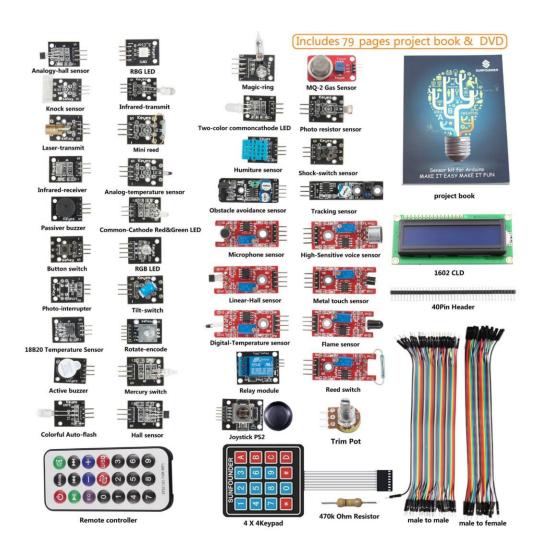

\$60 Arduino compatible, software and hardware Program in Python, C, PHP, JavaScript, Wiring Linux

Processing power of 1995 PC

Sensors

Actuators

Connecting Controller with Sensors & Actuators

- Hardware
 - Digital output: Turn on LED
 - Digital input: Is switch on?
 - Analog input: Voltage indicates temperature
 - Analog output: Voltage determines brightness of LED, position of servo (analog comes from PWM)
- Software
 - Libraries to read and write pins

WHERE TO BUY STUFF

	Notes	
amazon.com	Can get lot of stuff here shipped very quickly	
adafruit.com	Lot of cool info about arduino, rpi, educational material, kits, components	
makershed.com	Maker community, kits, educational material	
raspberrypi.org	All info about raspberrypi	
maker.intel.com	Info about galileo board	
dexterindustries.com	Robotics for raspberrypi and lego	
Sparkfun.com	Lot of sensors and kits for arduino, rpi	
Coocox.org	More peripherals and boards	
Freetronics.com	Lot of arduino compatible stuff	
Sainsmart.com	Lot of peripherals and sensors for arduino	
Codeduino	Lot of info about arduino and projects	
Avnet.com, digikey.com, mouser.com, frys, RS	Lot of electronic peripherals	

Check Shieldlist.org for a complete list

Programming Tools

Micro-controller

Arduino: Wiring (C-like)

Netduino: C#

Tessel: Javascript

Single Board Computer

- Raspberry Pi
- Intel Gallileo

Arduino IDE

- Arduino/Galileo
- Wiring/C
- Write code on laptop, push & run on arduino
- Simple, easy to use
- Many code examples and libraries
 - LED to web server
- Limited software tools
 - No debuggers
- Good enough when not much software

```
Blink | Arduino 1.5.3

File Edit Sketch Tools Help

Blink

Blink

Turns on an LED on for one second, then off for one second, repeatedly.

This example code is in the public domain.

// Fin 13 has an LED connected on most Arduino hoards.

// give it a name:

int led = 13;

// the setup routine runs once when you press reset:

void setup() {

// initialize the digital pin as an output.

printooe(led, OUTPUT);

}

// the loop routine runs over and over again forever:

void loop() {

digitalizeric(led, HIGH); // turn the LED off by making the voltage level)

delay(1000); // wait for a second

digitalizeric(led, LOW); // turn the LED off by making the voltage LOW

delay(1000); // wait for a second

digitalizeric(led, LOW); // wait for a second

digitalizeric(led, LOW); // wait for a second

digitalizeric(led, LOW); // wait for a second
```

Command Line

- Raspberry Pi/Galileo
- ssh to device
- linux
- vi
- C/python/node/PHP

ARM Linux Distributions

- Raspberry Pi processor not compatible with Debian ARM
- Use Raspbian
- Compile/build on raspberry pi
 - Can be slow (5-10x!)
- Cross-build on desktop
- Nginx instead of Apache + php

Galileo Linux Distributions

- Debian not compatible with x86 processor in Galileo
- Intel provides minimal linux
- Unofficial package repo: <u>http://alextgalileo.altervista.org/package-</u> repo-configuration-instructions.html
- Apache + php
- Official package repo coming soon

NodeJS With Intel XDK + Galileo

- Program Galileo with NodeJS
- Add packages to package.json
- Push project to galileo
- NPM install on galileo
- Launch app, see console on desktop
- Remote debugger
- Released on September
 30

IoT Hello World

- Blinking LED
- Browser controlled LED

Which Language?

- Best support for accessing pins:
 - Wiring (similar to C)
 - Python
 - Javascript
- Best support for making web interface
 - PHP
 - Python
 - Javascript

Demo: Toaster

- http://youtu.be/XkxyECSDN7Y
- "This is both ridiculous and AMAZING!!!"

Experiences

- Mechanical aspects can be time consuming
- Electrical is quick
 - Need to be more careful
- Software was easy

Summary

- IoT will affect every aspect of your life
- Combination of hardware, software, design
- Built on web technologies
 - Everything you already know will be useful
- Fun & easy to experiment & learn
